

Metal Shelving 2000H x 1200W x 500D Bolted Set

Product Images

Description

We offer premium 1.2m Long x 2m High x 0.5m Deep Metal Shelving, which combines heavy lifting capacity with the convenience and versatility of light shelving units. Hence, exactly what many clients in Melbourne, Sydney, Brisbane, Perth and other cities have been asking for (based on our years of experience within the industry).

The blue metal uprights are not welded as our other shelving.

They require assembly using included bolts and nuts.

To tighten bolts and nuts, spanner maybe required (not included)

The Key to Organised Small and Big Spaces

A likely contributing reason for the high demand for self storage space worth about \$1.1 billion, is people running out of space due to poor organization and using bulky storage equipment. This **2m Long x 2m High x 0.5m Deep Metal Shelving solves both issues at once:**

- the slim, yet super strong structure easily fits into small spaces and accommodates bulky goods
- organising is easy when you have such a modular structure that can stretch, expand and contract to you needs

Strong = Safe

Each shelf is strong enough to hold 100kg (meaning it won't buckle in case you climb up the shelf), with an overall 400kg capacity. Furthermore, thick shelf panels with back support completely eliminate all weak points. Moreover, bolts attaching the horizontal beams to the upright posts keep it all together when moving around.

Modular: No Need for Super-Powers to Shapeshift

The ingenious modular design lets you instantly change your storage layout. Certainly you will love this if you're a DIYer. So:

- Increase or decrease the space between shelf panels
- Remove the shelf panels to conveniently store such things as car tyres

Click to Install

You don't need a manual to:

- click in the horizontal beams to the upright posts
- fit the white shelf panels in between the horizontal beams

All-Round Application

This versatile 1.2m Long x 2m High x 0.5m Deep Metal Shelving keeps your stock/goods organized, anywhere:

- warehouse
- retail storage
- garage/shed e.g. storing your autolift
- home storage
- school
- library
- IT departments in banks, media and other firms
- storage or logistics environments
- any area requiring general storage

Even when your needs change, business grows or stock diversifies; you don't need to change your shelving - simply configure it.

Why You Need It

This strong and long-lasting metal shelving turns you recurring storage cost into a one-off cost; unlike the cheap galvanised stuff or other rudimentary alternatives that may require replacement at the most inconvenient time.

Don't worry, the powder coated metal withstands scratching, chipping, wearing and fading. It will still look as good as new through the years.

Value for Money

Get it from us at a very affordable price, with a **2-year warranty** or contact us if you have any queries. Also, we supply quality products to such reputable organizations as Monash University; The University of Queensland; and Melbourne Airport.

Metal Shelving Features

- 1.2m (height) x 2.0m (width) x 50cm (deep)
- Easy to assemble
- Colour: blue upright posts, orange horizontal beams and white shelf panels
- Versatile storage system for non-palletised goods
- 2-year warranty
- Can be constructed for general storage applications
- Racks are supplied FLAT PACKED in a heavy-duty box for easy transport
- Holds up to 100kg weight per shelf
- Holds a total weight of 400kg
- Height of shelves can be easily adjusted
- Powder coated
- slim yet super strong structure
- meets all quality safety standards
- removable shelf panels
- click-in and bolt attachment for horizontal beams to upright posts
